FINAL TEST HWLAB WINTER 2020-21

Q) Given a string of characters with opening and closing brackets. The task is to remove extra parentheses from the string and balance it. You may remove extra '(' and add extra ')' to balance the string.

Examples:

Input: str = "gau)ra)v(ku(mar(rajput))"
Output: gaurav(ku(mar(rajput)))

Input: str = "1+5)+5+)6+(5+9)*9"
Output: 1+5+5+6+(5+9)*9
